What this record is

Figures read from one database at the data cutoff below, by the build named below. Each entry carries the date and time it was recorded, the name the person doing it selected in the app, and the position the vial was in at the time.

What it is not

Names are selected, not authenticated — this app does not verify who is holding the tablet. Nothing here is a certification against any standard, and nothing here prevents this file being altered after it leaves the tablet.

The schedule

The longest gap is measured across the ends of the period as well as inside it, so a tank filled either side of a quiet stretch is not credited with a gap of zero.

Tank	Fills in period	Longest gap	Asked for	Within schedule
Dewar A (bench side)	13	7 days	every 7 days	Yes
Dewar B (cold room)	12	14 days	every 7 days	No

Every entry

Struck-out entries stay on the log and are marked. They do not count towards the schedule above.
